This Presentation is brought to you for free and open access by the Hampton Roads Intergovernmental Pilot Project: Meetings at ODU Digital Commons. It has been accepted for inclusion in December 2, 2014: Hampton Roads Climate Preparedness and Resilience Exercise Series by an authorized administrator of ODU Digital Commons. For more information, please contact digitalcommons@odu.edu.
Out-Brief Slides: Citizen Engagement
Desired Outcome(s)

- Provide a short description of the key desired outcome(s) for your working group / advisory committee
  - The goal of the Citizen Engagement Committee is to bring citizens into the planning process and encourage citizen participation.
  - The Committee wants to identify the several social networks and community organizations that have already been established as a way to avoid duplicative efforts.
  - The Committee felt that while there is not a need for new information, there is a need to better communicate and modify the existing information to show citizens the direct local impacts of sea level rise.
ACTIONS – Immediate

- Identify immediate actions that need to be taken in the next 60 - 90 days
  - Identify the existing social networks and community groups in the region.
  - Break down the issues and risks into a way that is engaging to the relevant communities.
ACTIONS – Near-Term

- Identify near-term actions that need to be taken in the next 6-12 months
  - After creating a database of existing social networks and groups, create a venue for engagement between these groups.
    - Engagement should explain why action needs to be taken and what can be done to prepare and educate their communities.
  - Localize the existing information to make it engaging and relevant to specific communities.
  - Create a website and/or mobile app that allows people to access information and help individual disaster planning.
ACTIONS – Long-Term

- Identify long-term actions that need to be taken in the next 12-18 months
  - Create universal awareness of the fact that the issue of sea level rise exists.
  - Educate people to know where to go when emergency conditions already exist.
Challenges and Opportunities

- What obstacles may prevent immediate, near-, and long-term actions from being completed?
  - There is no way for citizen feedback to make its way back to the Advisory Committees.
  - There are many community groups and organizations that focus on a multitude of climate change related issues, but they are not all connected.
  - There is no one universally usable way to being community engagement or how to gain traction in communities.
    - What resonates with one community may not with another.
    - Twenty-five percent of the Newport News population lacks access to internet, including vulnerable populations.

- What opportunities can you seize today to help you complete your immediate, near-, and long-term actions?
  - The ways to organize people already exist, they just need to be used.
  - Many networks exist for community warning, they just need to be localized to have an impact.
