In a few weeks, Thanksgiving awaits. Take some time to give yourself a pat on the back as you continue through the semester. You're making strides, and the world is better for it. Within this issue you will find pictures from the Graduate Alumni Homecoming Reception, a graduate student interview, multiple announcements, and growth opportunities. Let us know your thoughts!

-Xavier-Lewis Palmer

Great Times At The Graduate Alumni Homecoming Reception

The Homecoming Graduate Alumni Reception was held on October 24, 2019 at the Barry Art Museum. Alumni, faculty, and advanced graduate students were treated to live entertainment, food, company, and a wonderful keynote address by alumnus and nationally recognized young adult writer and author, Lamar Giles, 01’, 17’ MFA. His forthcoming novel is Not So Pure and Simple.

Pictures are courtesy of the Old Dominion University Alumni Association and Graduate School

What motivated you to seek a mentor? What were your objectives?
I have had a long-cherished desire to work in Natural Language Processing (NLP) and with a hands-on project to learn this domain. I chose Dr. Wu as he has experience in NLP.

What have you gained so far in your work together? What have you learned about yourself professionally/academically?
I learned a lot through this project. Academically, I have gained substantial amount of in-depth knowledge of NLP, and the work experience of NLP will help me to get an internship, which is a must for industry work.

What recommendations do you have for people seeking a mentor? I think people should know their goal, first. Based on that goal, they should then seek their mentors.

Describe your research.
My research is in deep learning and machine learning on computer vision and the NLP domain.

If you were given additional money for funding, what would you research and how?
I will do further hone my focus on NLP and try to make a bridge between NLP and computer vision through deep learning.

What are your long range and short range goals and objectives, when and why did you establish these goals and how are you preparing yourself to achieve them?
My long-term goal is to enhance my research and publish more papers so that I can get a great job in industry. Additionally, I need to find an internship. Now I am trying to publish more papers and practice different algorithms for deep learning.

What do you like most about your research or feel will be its largest implication(s).
Right now, I am working in two domains. In the computer vision domain, our work is to detect seagrass, which very important for the marine ecosystem. In NLP, to detect fake scientific news detection, which may make a broad impact on society.

Tell us about your vision of the field: where do you think the field is headed in the next five years?
AI or deep learning will dominate the future.

What changes would you make in your college or university if you could? Why?
[I would] hire more AI and deep learning professors and build additional labs.

What’s one of your areas of research? [One of them is] towards Detection of Fake Scientific News. The phenomenon of spreading scientific misinformation to the public is not new. The gap between public opinions and the scientific consensus on topics such as vaccine safety, evolution, or climate change have existed for a long time. Nowadays, people are more strongly connected through social media such as Facebook, Twitter, and LinkedIn. Statistics indicate that 62% of U.S. adults get news on the social media in 2016 as opposed to only 49% in 2012. Through the widespread social media and mobile devices, it is easier to spread fabricated and misleading news and articles, which may cause illusion, confusion, and even violence. The ultimate goal [of this project] is to build a mobile app that tells the credibility of scientific news posted on social media. To do so, we divided our goal into sub-goals. First, we need to extract the domain keywords from the scientific news article and then use those keywords to search the relevant scholarly papers. Secondly, we compare the claims of the science articles with the retrieved scholarly paper and get the score, which indicates the credibility of that scientific news articles. This summer, we accomplished the first subgoal and submitted our work to a conference (K-CAP).
The Graduate School will be hosting the eighth annual Graduate Research Achievement Day (GRAD) on Thursday, April 9, 2020, from 12:00 p.m. to 2:00 p.m. in Webb University Center. GRAD is a great opportunity for students to showcase their research for the campus community while networking with other students and learning about the great diversity of research and scholarship at Old Dominion University.

Students interested in participating must submit a poster proposal that consists of the graduate student's name, any co-authors, a project title, and a 300-word maximum abstract. The proposal must be submitted no later than Friday, February 7, 2020, at 5:00 p.m. to https://bit.ly/2mfNn92. Proposals that do not follow the formatting requirements or are submitted late run the risk of not being accepted.

Students in disciplines that do not normally undertake poster presentations and who would like to participate may contact Mr. Xavier-Lewis Palmer, Graduate Administrative Assistant for the Graduate School, for assistance at xpalmer@odu.edu. Distance students are also welcome to submit proposals. Please note, that while faculty advisors, undergraduates, or other non-graduate students may be co-authors of proposals, they cannot be first authors or present the poster at the event.

Old Dominion University’s Graduate School in partnership with the Office of Research is pleased to announce the return of the Graduate Summer Award Program (GSAP). Open to graduate students from across the University, the GSAP is a competitive program that supports a range of original graduate student scholarship, including basic research, field study, data analysis, performances and exhibitions, and community-based learning initiatives. The program can be used to support thesis or dissertation projects or other capstone projects at the master's or doctoral level. The scope of the proposed project should allow the graduate student to produce a measurable research or scholarly product by the end of a minimum of six uninterrupted weeks during the summer months.

Graduate students wishing to apply for this award must identify and approach a faculty member to serve as a mentor during the tenure of the program award. The faculty member may advise the student in creating a strong project proposal, explain the expectations for scholarly activity, supervise the scholarly activity, and provide advice from the proposal stage to the completion of the final report. However, the faculty member is not permitted to produce work on behalf of the student. Students applying for the award will be the primary investigators for these projects. It is expected that a graduate student with this funding will produce a work with original scholarship. The award is not for lab assistant or graduate assistant duties that support a faculty project.
Un-Silencing the Holocaust Past
Via Study Abroad to Poland

November 6, 2019 / 6:30 - 8:30 pm
Darden College of Education Building
Multipurpose Room, 1106

Presented By:
Dr. Annette Finley-Croswhite (History)
Dr. Thomas Chapman (Geography), and
Their 2019 Study Abroad Students

Sponsored By:
The Institute for Jewish Studies and Interfaith Understanding, Office of
Academic Affairs, College of Arts & Letters, Center for Faculty
Development and Office of Study Abroad
President’s Lecture Series: Travis Mills

November 19, 2019
Chartway Arena at the Ted Constant Convocation Center | 7:00 p.m.

Retired U.S. Army Staff Sergeant Travis Mills of the 82nd Airborne is a “Recalibrated Warrior” and international advocate for veterans and amputees. He is one of only five servicemen from the wars in Iraq and Afghanistan to survive his Injuries as a quadruple amputee.

In April of 2012, an IED explosion cost Mills portions of both legs and arms. Seventeen months later, he founded the Travis Mills Foundation, a nonprofit organization that benefits and assists wounded and injured veterans.

Mills’ story inspired the documentary “Travis: A Soldier’s Story,” which played in theaters nationwide. It also has been featured on local and national news, including Fox News, CNN and “The Ellen DeGeneres Show.” Mills’ story is being adapted into a major motion picture directed by Sylvester Stallone and starring Stallone and Adam Driver.

All lectures are free and open to the public. Seating is limited, guests are encouraged to RSVP at odu.imodules.com/TML19.

James Madison University hosted a successful gathering of leaders from the Virginia Graduate Student Associations (GSA), including attendees from George Mason, James Madison University, Longwood, Norfolk State University, Old Dominion University, University of Virginia, Virginia Commonwealth University, Virginia Tech, and William & Mary. Each GSA helps to shape their school’s graduate school policies, and together, they help to share best practices when each GSA meets. Pictured below are the attendees (GMU) Natalie Gelbvaks; (JMU) Michael Facey, Christine Verdream, Collin Ashley, and Janelle Fernandez; (W&M) Nick Belluzzo, Richard Reksoatmodjo, Casey McLaughlin, Jessica Burns, Ryan Chaban, Holly Gruntner, and Tomas Evans; (Longwood) Morgan Cassidy, Marie Danner, Emory Reed, and Eric Petrides; (VCU) David Hampton and Sarah Saunders; (NSU) Dañetta Evans and Devonna King; (VT) Hani Awni, Alexis Hruby, Courtney Steele, Sharon Stidham, and Maruf Hoque, Martina Svyantek; (ODU) Lucas Potter, Ali A. Huazy, and Danielle Winters; (VSU) Stephanie Davis, Nneka Osiah, and Cheryl Adeyemi; and (UVA) Paul Zivick. If you are interested in joining Old Dominion University’s Graduate Student Association as it is reorganized, please contact the Graduate School’s Graduate Administrative Assistant, Xavier Palmer at xpalmer@odu.edu.
LET'S TALK GRAD LIFE

HELPING GRADUATE STUDENTS MASTER THE BALANCING ACT

Time: 5:30 PM - 7:00 PM
Location: 2100 Monarch Hall
Use the links to RSVP!

Snacks will be provided!
RSVPs limited to 32 students per session.

- October 16th – Introducing Self-Care
  http://bit.ly/LetsTalkSelfCare
- October 23rd – Identifying & Managing Life’s Stressors
- October 30th – Handling Relationships with Family, Friends, & Faculty
- November 6th – Resolving Conflicts in their Various Forms
- November 13th – Financial Management when You’re Broke

3MT REMINDER

Please save the date for this fall’s 3MT Competition. The 3MT Finals will occur on Thursday, November 21, 2019, from 5 – 8 p.m. in the University Theatre (5 p.m. reception; 6 p.m. competition start). An audience RSVP will be sent out in October. Prize money and the opportunity to represent ODU at a regional conference are at stake! Practices and trainings are underway to prepare student competitors.

NETWORKING EVENT FOR ENTREPRENEURS: unWINEd

Bringing innovators, thought-leaders, and entrepreneurs together

unWINEd

Wednesday, November 6, 2019
4:00 PM to 6:00 PM
special location!

The Forrest Gallery Studio of Fine Photography
5473 Shore Dr.,
Virginia Beach, VA 23455
