Thank you to the reviewers of *AGU Advances*.

In 2020, we all faced the enormous and unexpected challenges of the Covid-19 pandemic, with its host of new and competing demands on our time. Thus, we are especially grateful to the 154 people who provided reviews for *AGU Advances* and helped our fledgling journal complete its first year. Peer-review is essential to the process of doing and publishing science, and our reviewers have helped define our new journal by indicating papers expected to have broad impact that advance a discipline, have broad impact across disciplines, or have policy relevance.

All papers submitted to *AGU Advances* first go through an editorial consultation. We are committed to respecting reviewers' time and only send papers for review that the consulting editors agree meet our criteria. Sometimes this means we send papers back to the authors with suggestions how to improve the fit to our journal. Another way we try to streamline the review process is by giving the authors the option to transfer reviews if after review we decide the paper is better suited to another AGU journal.

As a relatively new journal, we still have few enough reviewers that we do not want to identify them by name. Nonetheless, you know who you are. Please accept our sincere thanks for generously sharing your expertise and working to improve *AGU Advances*.
